

# The MOHW's Administrative Achievements in 2018

衛生福利部  
Ministry of Health and Welfare

# Important MOHW Policy Implementation In 2018

## Stable Society

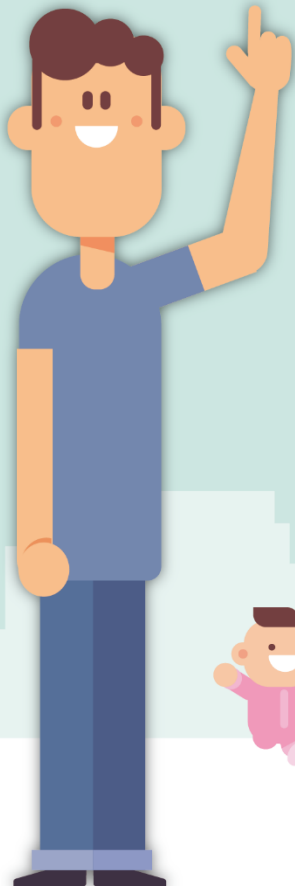

- ❑ Improving Social Safety Nets
- ❑ Building Friendly Environments for Families with Children
- ❑ National Ten-year Long-term Care Plan 2.0
- ❑ Food Safety Policy

## Healthy Nationals

- ❑ Health Care Reform for a Healthy Nation
- ❑ Attaining Optimal Disease Control Standards
- ❑ Health Promotion

## Technology

- ❑ New Southbound Policy
- ❑ Biotechnology Innovations Expand Biomedical Capacities
- ❑ Implementation Results and Future Plans

# In the new generation of technology, 3 major trends towards the future.

- ❑ New Southbound Policy
- ❑ Biotechnology Innovations Expand Biomedical Capacities
- ❑ Implementation Results and Future Plans

## New Southbound Policy : Enhance International Influence and Create Taiwan's Medical and Health Industry Business Opportunities

### The missions of One Country, One Center

- ❑ Expanding professional training programs
- ❑ Building medical industry collaborations
- ❑ Providing health consultation services
- ❑ Building a multicultural friendly health environment
- ❑ Reviewing regulations and undertaking market surveys

Recent years have seen steady growth in patients visiting from South and Southeast Asia.

This project will add Myanmar and Brunei as primary partners in 2019.

## New Southbound Policy : Enhance International Influence and Create Taiwan's Medical and Health Industry Business Opportunities

### New southbound policy in epidemic prevention

### Strengthen regional epidemic prevention capacities

- ❑ Taiwan and the United States co-organized an International Workshop on Laboratory Diagnosis for Enterovirus.
- ❑ The Center for Epidemic Disease Prevention and Technology Transfer collaborated with Vietnam and Indonesia to organize international workshops on tuberculosis and dengue fever prevention.

### Certificate in medical devices and pharmacy

- 3 Taiwan laboratories with MOHW's recommendation have been certified by Indonesian authorities.
- Malaysia's National Pharmaceutical Regulatory Agency allow Taiwan's qualified stakeholders applying through the TFDA to use English letters of approval for reference.

This policy aim to rengthen and integrate business contributions to Taiwan's medical and health systems and jointly improve public health.

# Biotechnology Innovations

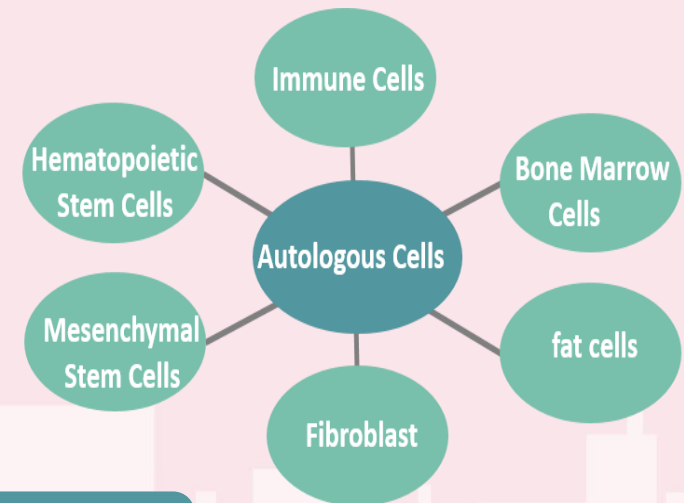

As the population ages, new infectious diseases increase, medical technology advances, and precision medicine flourish, the biotechnology industry is becoming more and more important.

Thus, we want to **make Taiwan into a biomedical research and development center in Asia-Pacific area.**

## Promote Regenerative Medicine

MOHW have:

- 1) drafted the regulations on regenerative medicinal products to secure quality, safety, and patients' welfare
- 2) accepted applications for 6 cell therapy technologies to accelerate clinical applications.

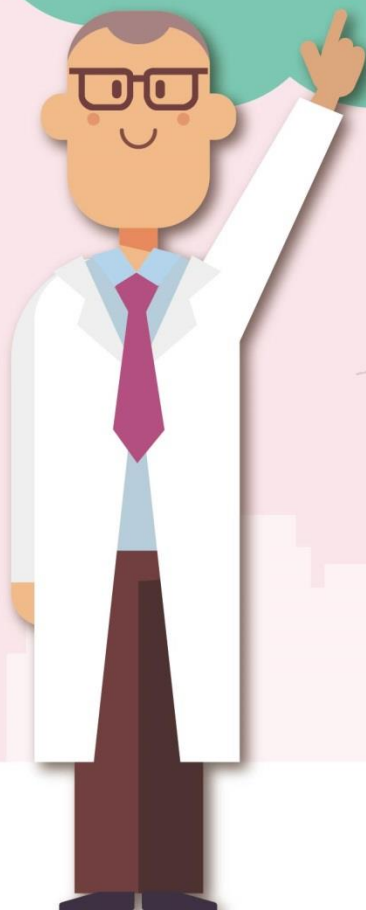

These treatments currently target cancer as well as cardiovascular and osteoarticular diseases.

# Biotechnology Innovations

## Precision Medicine

Test

Prevent

Clinical  
Management

We also formed Taiwan Rare Diseases Network and interpreted of human genetic code gradually.

The benefits of these definitive diagnoses include:

- 1) optimized medication
- 2) improved clinical management
- 3) prenatal diagnoses
- 4) counseling at reproductive clinics
- 5) understanding disease pathogenesis
- 6) facilitating drug development.

## Medical and Health Industry Marketing Strategy

On-line and  
Off-line  
Fusion Mode

Taiwan Healthcare+  
International Marketing  
Alliance Portal Platform

Overseas Bases for  
International Marketing  
Promotion

Ministry of Health and Welfare

## Promote health care smart services (the Health Clouds 2.0)

### Results and Future Plans

#### Long-Term Care Clouds

To help improve  
information operations  
and refine service quality

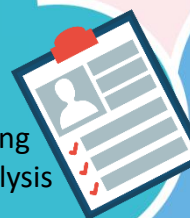

#### Medical Cloud

To allow hospitals to share 20  
categories of examinations  
(tests)

#### Epidemic Prevention Clouds

To improve the timeliness of epidemic  
prevention and potential advance warning  
functions with cloud-based big data analysis

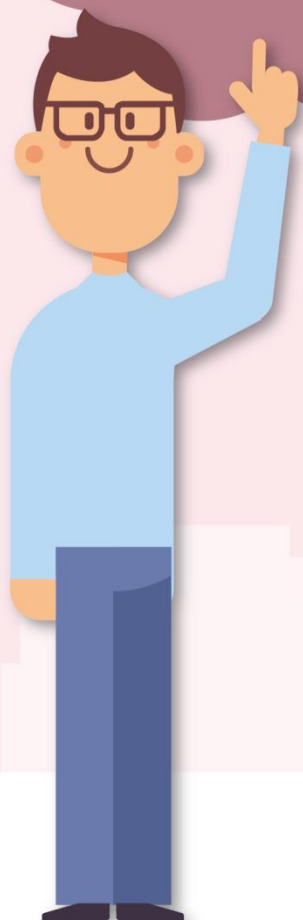

#### Wellness Clouds

To build My Health Bank to  
improve public's health  
literacy

# Results and Future Plans

## Smart social welfare internet

An one-stop digital service system

Smart Social Safety Net

This system provide Online, over-the-counter, house call service.

There are 47 service items including subsidy application, resource matching, referral, welfare enquiry.

The application time is about 7 days.

Assisting social welfare centers in local governments to carry out informatization, to build a social welfare net with complex data.

The Smart Social Safety Net features in integrated services, risk warning, data analyzing and information sharing.

The public satisfaction of this service was nearly 90% in 2018.
